

Amazing Air wisdoms (Air planes)

by
Adrian Berkovich

You did excellent work on your book. It was hard when you started. It was hard to decide what was important, and you did it!

Table of Contents

International

Jets

2

Passenger

3

Jetblue

4

United

5

Where do planes

6

start from?

Where do I go to

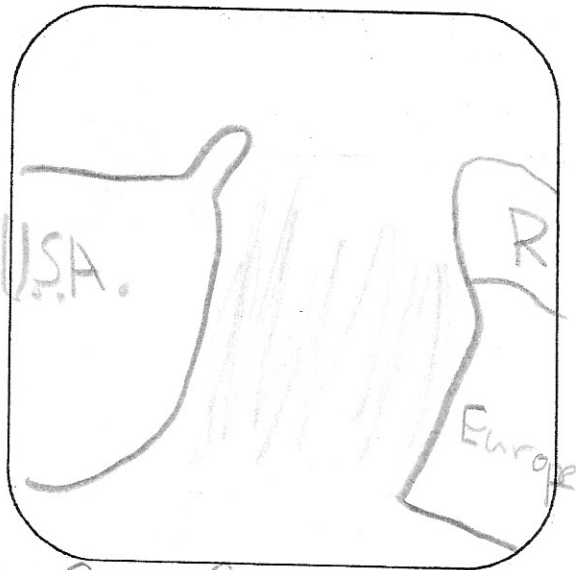

7

sleep?

About the author

8

International (out of country)

Did you know not all airplanes go inside just your countries

You will learn the

point of it. The

point is to fly

far from your home. It takes

about an hour to cross the

ocean. International planes go from J.F.K

because that's the airplane that goes

out of countries.

Fun Fact

Did you know International needs 2 times of gas than it needs.

Jets

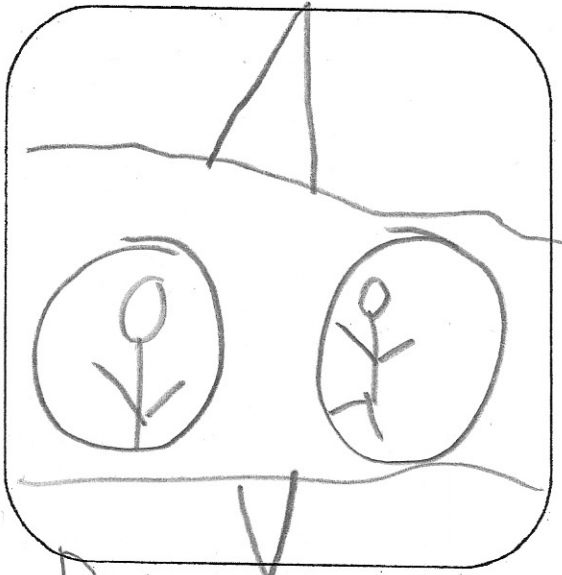

Did you know not all planes take you soon. Well these can. If you take a Jet it will be

a total zoom! Jets fly in normal weather. Did you know the first Jets were a little dangerous because they were made of paper metal and didn't have comfortable seats.

Fun Fact

Jets are aggressive planes. They're built to help people get getting around our universe.

Passenger

Did you know
some air planes don't
have space to carry
people. Well these have
do. If you take a

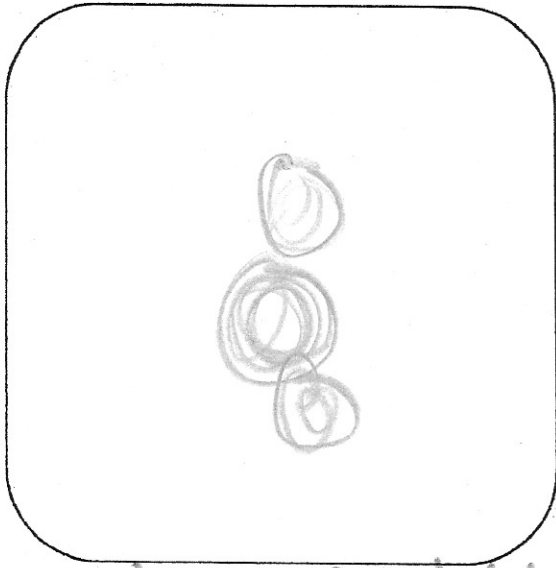

to much
luggage

Passenger airplane you'll have
comfortable seats and activities and
snacks. They take people to vacation
for greetings.

Fun Fact

Did you know if people are
to heavy the plane can't have
controls

Jetblue

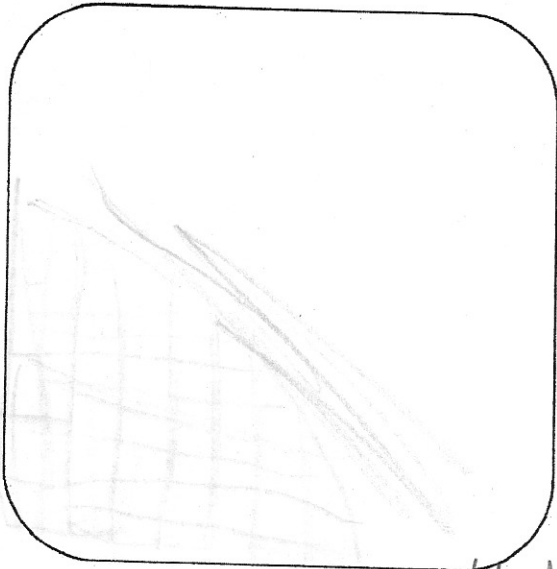

Did you know some jets can be called funny. But you'll get the reason why. Did you know

why Jetblue is called Jetblue? Because it can go over blue spots for example Florida is where Jetblue goes to. Jetblue comes often to JFK and Laguardia.

Fun Fact

Jetblue goes all around America.

United

Did you know
the universe is
surrounded by United.

United is the
size of 150

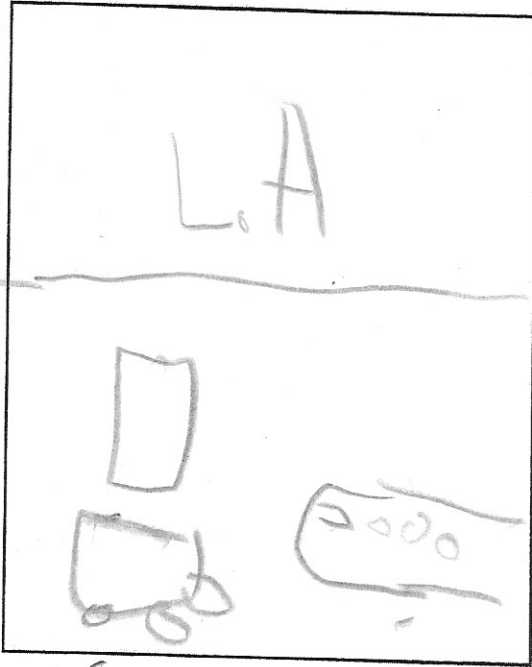

passengers. United was used to be
called Continental. This airline
has been here since the 1930s.

United has a golden stripe to
show shine. know oth

Fun Fact

Did you know this
Airline is international?

Where do planes start from?

Do you know
where planes stay
and place you can
watch them.

An AIRPORT!

An Airport is
where you wait

for your plane because you
can't just drive to your

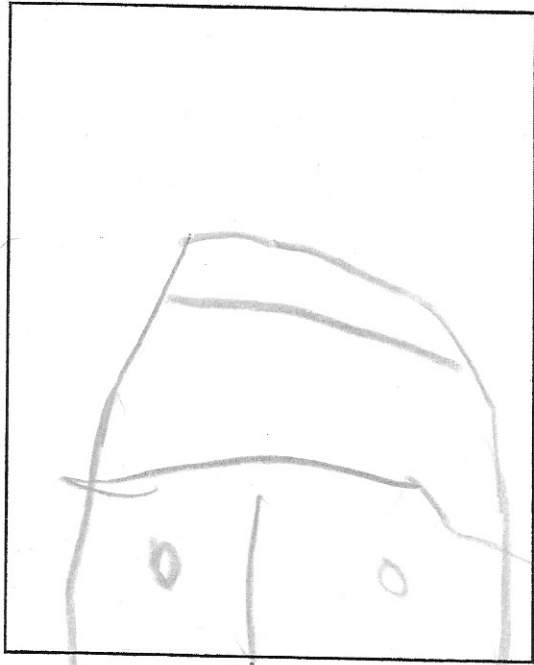

plane right away. Airports are everywhere.

In New York, LaGuardia airport
there is Jetblue, Air Canada, United,
Delta, Southwest, Fed Ex Express
and American.

Fun Fact

Airports aren't just for
waiting, there for enjoying!

Where do I sleep?

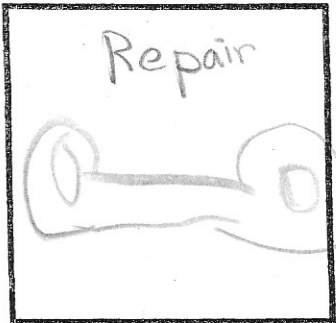

repaired before motion.

Did you know airlines
don't just stand where
you wait and sleep. They
sleep in a special shed.
In there they also
get repaired. Any
electric mower get's

Fun Facts

Snore! The shed fits 5 airplanes
at a time. Not only the plane goes
in, the luggage carrier goes in! The most
intrasting part is engineering the electricity
because you get to see how it works.
Each airplane has it's own shed. For
an example Jetblue airways goes
to it's shed.

Glossary

Repairs are when something doesn't work or it's time to end the day.

A Shed is where an airplane sleeps and gets repaired for a new day.

A Universe is our land.

Luggage is where you put your stuff, like your clothes.

Comments

I didn't know that
you know so much
about air planes
from my MAX.

Isaac

I like the spelling

because it was

easier to read!

Aiden I like the

pictures I did

not know there

was steps for

air planes! Trisha

What I Learned

I learned that if a passenger is too heavy, he'll have to delay the ride. - Isabel J.

I learned why Jetblue is called Jetblue. - Hillary

About the author

Hi my name is Adniam, and I got intrusted because I'm studying flyness. I live around the east side of the United States and watch air planes soar. I use air planes a lot of times.
